**Semester One
Examination 2018
Question/Answer booklet**

**MATHEMATICS
APPLICATIONS UNIT 1**

**Section Two:
Calculator-assumed**

Student Name: _____

Teacher's Name: _____

Time allowed for this section

Reading time before commencing work: ten minutes
Working time for paper: one hundred minutes

Material required/recommended for this section

To be provided by the supervisor

This Question/Answer booklet
Formula Sheet (retained from Section One)

To be provided by the candidate

Standard items: pens (blue/black preferred), pencils (including coloured), sharpener,
correction tape/fluid, erasers, ruler, highlighters

Special Items: drawing instruments, templates, notes on two unfolded sheets of A4 paper,
and up to three calculators approved for use in the WACE examinations.

Important note to candidates

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

Structure of this paper

	Number of questions available	Number of questions to be attempted	Working time (minutes)	Marks available	Percentage of exam
Section One Calculator—free	6	6	50	50	35
Section Two Calculator—assumed	14	14	100	100	65
					100

Instructions to candidates

- The rules for the conduct of Western Australian external examinations are detailed in the *Year 12 Information Handbook 2018*. Sitting this examination implies that you agree to abide by these rules.
- Answer the questions according to the following instructions.

Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.

It is recommended that you **do not use pencil**, except in diagrams.

- You must be careful to confine your responses to the specific questions asked and to follow any instructions that are specific to a particular question.
- Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
 - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
 - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question that you are continuing to answer at the top of the page.
- The Formula Sheet is **not** handed in with your Question/Answer Booklet.

Section Two: Calculator–assumed**65% (100 marks)**

This section has **fourteen (14)** questions. Attempt **all** questions. Write your answers in the spaces provided.

Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.

- Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
- Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question(s) that you are continuing to answer at the top of the page.

Working time: 100 minutes

Question 7 (4 marks)

The variables x and y are related by the formula $y = \frac{3x + 1}{x - 4}$.

Determine:

(a) the value of y when $x = 6$. (1 mark)

(b) the value of y when $x = -\frac{1}{3}$. (1 mark)

(c) the value of x when $y = 7$. (2 marks)

Question 8 (9 marks)

As at October 2017, the value of ten Australian dollars in foreign currencies is given in the table below.

Foreign Currency	\$10 Australian AUD
US dollars	\$8 US
Malaysian Ringgit	33.5 Ringgit
Balinese Rupiah	105 000 Rupiah

(a) State the value of \$1 AUD in US dollars. (1 mark)

(b) How many Malaysian Ringgit could be purchased for \$50 AUD? (1 mark)

Barry travels to Bali, after first visiting Malaysia. He has \$1000 AUD, 1 000 000 Rupiah and 2000 Ringgit with him.

(c) What is the total value of his currency in Australian dollars? (3 marks)

He exchanges the Ringgit for Rupiah.

(d) Use the Australian dollar conversion to find how many Ringgit he would receive. (2 marks)

A taxi to the airport will cost Barry 300 000 Rupiah. He has \$30 AUD and 50 000 Rupiah in cash. He gives it all to the driver.

(e) Show clearly that he has been generous to the taxi driver. (2 marks)

Question 9 (6 marks)

Erica's new car cost her \$30 000. She sold it three years later for \$21 500.

- (a) Determine the loss in dollars. (1 mark)
- (b) Calculate the loss as a percentage of the cost price. (2 marks)
- (c) Show how to use the formula $V = V_0 (1 - r)^t$, where V = value at time t years, V_0 = original value and r = rate of depreciation, to determine the rate of depreciation per year. Give your answer as a number of % pa, correct to one decimal place. (3 marks)

Question 10 (7 marks)

Part of a Water Usage and Service Account is shown below.

Water Use: 8 kL at \$1.158 per kL = \$12.14

Total water used in 63 days was 8000 L.

(a) What does the kL stand for? (1 mark)

(b) Determine the average cost of water per day over this period. (1 mark)

The service charge is made up of water supply charge and also sewerage charge.

The water supply charge was \$40.13

The service charge was a total of \$141.57

(c) Determine the sewerage charge. (1 mark)

(d) Calculate the total Water Use and Service Charge. (1 mark)

The total amount can be paid by credit card. A transaction fee of 0.48% applies.

(e) How much would the transaction fee be if this account is paid by credit card? (1 mark)

Interest is charged on overdue amounts at a rate of 11.88% pa. Assume there are 365 days in the year.

(f) Mary has an overdue bill of \$227, and today it is 25 days overdue. If she pays it today, how much interest will she have to pay? (2 marks)

Question 11 (9 marks)

(a) Determine the value of x , correct to two decimal places, in each of the following triangles.

(i)

(2 marks)

(ii)

(2 marks)

(b) Old MacDonald had a farm, and on that farm he had a gate, as shown

He measures the length, the width and the diagonal.

He wants to know whether the gate is “square”. That is, whether it is right angled.

(i) Use Pythagoras’ Theorem to determine whether the gate is “square”. Assume his measurements are as correct as his measuring tape will allow. (3 marks)

(ii) What other measurements could be used to answer the same question, without referring to Pythagoras’ Theorem? (2 marks)

Question 12 (9 marks)

The tax table for Australia for 2016–17 is shown below.

Taxable Income	Tax on this Income
0 – 18 200	Nil
18 201 – 37 000	19c for each dollar over \$18 200
37 001 – 80 000	\$3572 plus 32.5c for each dollar over \$37 000
80 001 – 180 000	\$17 547 plus 37c for each dollar over \$80 000
180 001 and over	\$54 547 plus 45c for each dollar over \$180 000

- (a) Nate has a taxable income of \$25 000. What % of his income is paid in tax? (3 marks)
- (b) Jenny has an annual income of \$22 000. She has tax deductions of \$4632. How much tax does she need to pay on this income? (2 marks)
- (c) Justin paid \$3572 in tax. What was his taxable income? (1 mark)
- (d) Amber paid \$600 in tax. What was her taxable income? (3 marks)

Question 13 (8 marks)

Francine is offered a loan amount of \$6000 to help finance an overseas trip. She will repay that amount plus interest at the end of the three years. She has a choice of:

Loan A – an interest rate of 6% pa simple (flat) interest.

Loan B – a rate of 5.5% pa compounded monthly.

- (a) Which loan should she choose? Justify your answer. (5 marks)

Francine invests some of the \$6000 for two years prior to her departure overseas. She receives 7% pa simple interest during that time, and has a final balance once interest is added of \$720.

- (b) How much did she invest? (3 marks)

Question 14 (7 marks)

A garden nursery sells two types of home herb packs, labelled Home Herbs A and Home Herbs B. Home Herbs A contains 3 punnets of coriander, 2 punnets of basil and 5 punnets of cumin. Home Herbs B contains 6 punnets of coriander, 3 punnets of basil and 8 punnets of cumin.

- (a) Write this as a 2×3 matrix called H. (1 mark)

The cost of each punnet of coriander, basil and cumin is \$2, \$3 and \$4 respectively.

- (b) Write this as a 3×1 matrix called C. (1 mark)

- (c) Determine HC and interpret the information it represents. (2 marks)

The local garden centre purchases 30 packs of A and 40 packs of B.

- (d) Use matrix multiplication to determine:

- (i) the total number of punnets of each herb the garden centre has purchased. (2 marks)

- (ii) the total cost to the garden centre. (1 mark)

Question 15 (8 marks)

The table below shows the pay rates at Amanda’s work place.
There is no work on Saturday or Sunday.

Day	Rate per Hour
Monday – Friday	\$30
Public Holiday	Time and a half

Over the last month, Amanda worked on 19 normal days and on one Public Holiday.
Amanda works 8 hours per day when she works.

(a) Calculate Amanda’s income for the month. (2 marks)

(b) How many hours worked on a public holiday equate to a full day’s work on a non–holiday workday? (1 mark)

(c) One particular month Amanda received \$5040. How many Public Holidays were there in that month? (2 marks)

Amanda receives a pay rise of 5% per hour.

(d) What is her new normal daily rate per hour? (1 mark)

(e) By how many percent does her Public Holiday rate increase? Explain. (2 marks)

Question 16 (10 marks)

- (a) AC is the diameter of the circle centre O. Lengths are in cms.
Calculate the area of the shaded region.

(5 marks)

- (b) This is the net of a solid cylinder, which has a radius of 6 cm.
(i) Calculate the volume of the cylinder.

(2 marks)

- (ii) Calculate the surface area of the cylinder.

(3 marks)

Question 17 (7 marks)

At an end of year party, some people have brought gifts to give to others. Matrix G has that information.

		Has a gift for this person			
		A	B	C	D
G = This person	A	0	1	1	1
	B	0	0	1	0
	C	1	0	0	1
	D	0	0	0	0

(a) Answer the questions about information displayed in the matrix.

(i) What information is provided in Row 2 Column 1? (1 mark)

(ii) Who brought the most gifts for friends? (1 mark)

(iii) How many gifts did C receive? (1 mark)

One person received the same gift from a friend, as he gave to that friend.

(iv) Who was that person, and who was the friend? (1 mark)

(b) (i) Calculate G^2 . (2 marks)

(ii) Is there a meaning to G^2 in the context of the question? (1 mark)

Question 18 (5 marks)

The network below shows possible paths (two way and one way) between vertices A, B and C.

- (a) Complete the matrix which represents the one stage routes shown on the network. (2 marks)

		To		
		A	B	C
From	A	2	1	0
	B			
	C			

- (b) Hence, or otherwise, determine the two stage route matrix for the same network. (3 marks)

		To (In two stages)		
		A	B	C
From	A			
	B			
	C			

Question 19 (3 marks)

A packet of ten small chocolate bars, each of which weighs 20 g, costs \$5.20
A chocolate slab, weighing 150 g, costs \$3.80

Use the unit method to determine which is the better buy.

(3 marks)

Question 20 (8 marks)

A triangular region on a map has sides measuring 1 cm, 1.5 cm and 2 cm.
The scale on the map is 1:200

- (a) What are the dimensions of the longest side in the real region, expressed in metres?
(2 marks)
- (b) Are the three angles of the triangle on the map equal to the corresponding three angles of the real triangular region? Explain.
(2 marks)
- (c) What is the area of the real triangular region, expressed in m^2 ?
(Hint: Use Cosine rule)
(4 marks)
